KRRISH GUPTA

Product Management Intern | Product Thinking • Data Analytics • Agile Delivery • Technical Depth

Delhi, India | +91-83075-13569 | Krrishg1977@gmail.com | github.com/krrish5235 | linkedin.com/in/krrish-gupta-a34492272

PROFESSIONAL SUMMARY

Final-year Computer Science student (2027) who builds user-facing products end to end, from idea and requirements to live deployment, with four live-deployed projects, an agile software internship and a data analytics internship (Python, Advanced Excel, Power BI). Pairs technical depth with analytical thinking: dashboards that turn raw data into client-facing reports and a forecasting model with 1.2%–8.1% median error on a 180-video backtest. Eager to learn product strategy, roadmapping and user research at Delhivery.

SKILLS

Product & Delivery: Product lifecycle (idea to deployment), feature scoping, user workflows, admin & role-based experiences, Agile / SDLC, cross-functional collaboration with engineers

Analytics: Data analysis, interactive dashboards (Power BI), Advanced Excel, SQL, forecasting & backtesting, metrics-driven decision making

Technical: Python, SQL, TypeScript, JavaScript, Java, React, Node.js, REST APIs, Git/GitHub, Docker

AI: LLM integration (Gemini API), RAG pipelines, LangGraph, ChromaDB, prompt engineering

EXPERIENCE

1M1B (One Million for One Billion) — Data Analytics Intern *Remote | Jun 2026 – Sep 2026*

- Completed a competitive 4-month program in Python, Advanced Excel and Power BI focused on real-world data analysis.
- Built interactive dashboards and automation scripts that turned raw data into actionable, client-facing reports.

Banyanbrain Digital Pvt. Ltd. — Software Development Engineer Intern *Remote | Dec 2025 – Feb 2026*

- Contributed to full-stack feature development in an agile team over a 62-day internship, collaborating with senior developers on technical design.
- Created test data and tested and debugged features end to end, working through Git.

PRODUCT PROJECTS

PawFind — Pet Adoption Portal *GitHub | Live Demo*

Java, Spring Boot 3, MongoDB Atlas, Spring Security, Docker

- Built and deployed an adoption portal with search, wishlist and a 3-stage status-tracked workflow (Submitted → Under Review → Approved/Rejected), plus an admin dashboard.
- Designed separate USER and ADMIN experiences with role-based access, Google OAuth2 login and CSRF protection.

ELITE MOTORS — Full-Stack Vehicle Showcase *GitHub | Live Demo*

React 18, TypeScript, Node.js, Express, PostgreSQL, Tailwind CSS

- Built and deployed a showcase app spanning 3 vehicle categories (cars, bikes, private jets), including an Indian-market collection.
- Shipped live search, a favorites system, an admin CRUD dashboard and a drag-to-rotate 360° viewer.

Doc-Aware Research Agent — Agentic RAG Assistant *Live Demo*

Python, LangGraph, Google Gemini, ChromaDB, Embeddings

- Built an AI assistant that answers from the user's uploaded documents first and falls back to live web search, telling the user which source answered.
- Supports 4 file formats (PDF, TXT, MD, DOCX) with instant indexing; deployed on Render.

SocialPulse V2 — Forecasting Pipeline *GitHub*

Python, Flask, Weibull modelling, RK4, Docker, pytest

- Built a forecasting pipeline with 1.2%–8.1% median error on a 180-video backtest; containerized with Docker and covered by pytest.

Other: JARVIS-style AI desktop assistant (in progress, with human-confirmation approval flow for AI actions); SWIFT-SPLIT 2.0 secure file fragmentation system; CEREVIA 2.0 Gemini chatbot with sentiment analysis and crisis detection; MY-PORTFOLIO; Sorting Visualizer; SQL Query Xeno; LeetCode DSA Vault.

EDUCATION

Chandigarh University — B.E. Computer Science Engineering | Currently in 7th Semester *Aug 2023 – May 2027*

CERTIFICATIONS & ACHIEVEMENTS

- 2 published research papers | 2nd Rank, Maths Carnival
- Wipro Certified: Java Full Stack | Anthropic: Claude Code 101 (Sep 2026) | Samsung Innovation Campus AI Certification | Coursera: Java
